PALRUF® Long Term Agricultural Roofing

Farm structures such as barns, pigpens, henhouses, dairies, stables, warehouses or sheds can be challenging for any roofing material. Gasses typical of a livestock environment or weathering slowly corrode them and demand high maintenance, which is both costly and time consuming.

This is not the case with PALRUF corrugated PVC sheet. It is virtually maintenance free and will endure these environments for very long service periods under the toughest conditions, which also makes it cost-efficient.

PALRUF has been produced by Palram for almost 50 years and has been installed in numerous barns, dairies, henhouses, pigpens and similar projects. Many customers, who used PALRUF roofing, have chosen it again to cover renovated and new structures.

The advantages of PALRUF can be used in a number of applications:

- Roofing of complete structures
- Internal cladding - to enhance chemical resistance
- Light roofing such as canopies, service sheds and more
- Barn skylights (rooflights)

Main Benefits

Excellent Chemical Resistance

PALRUF is ideal for the storage of chemicals and fertilizers.

Non-Corrosive

PALRUF withstands gasses emitted in livestock structures.

Fire Resistance

PALRUF self-extinguishes and meets the highest standards in the field.

Versatility

Suitable for curved roofing.

High Impact Strength

Resisting hail, wind and snow loads.

Appearance Maintained

Does not yellow or fade for years.

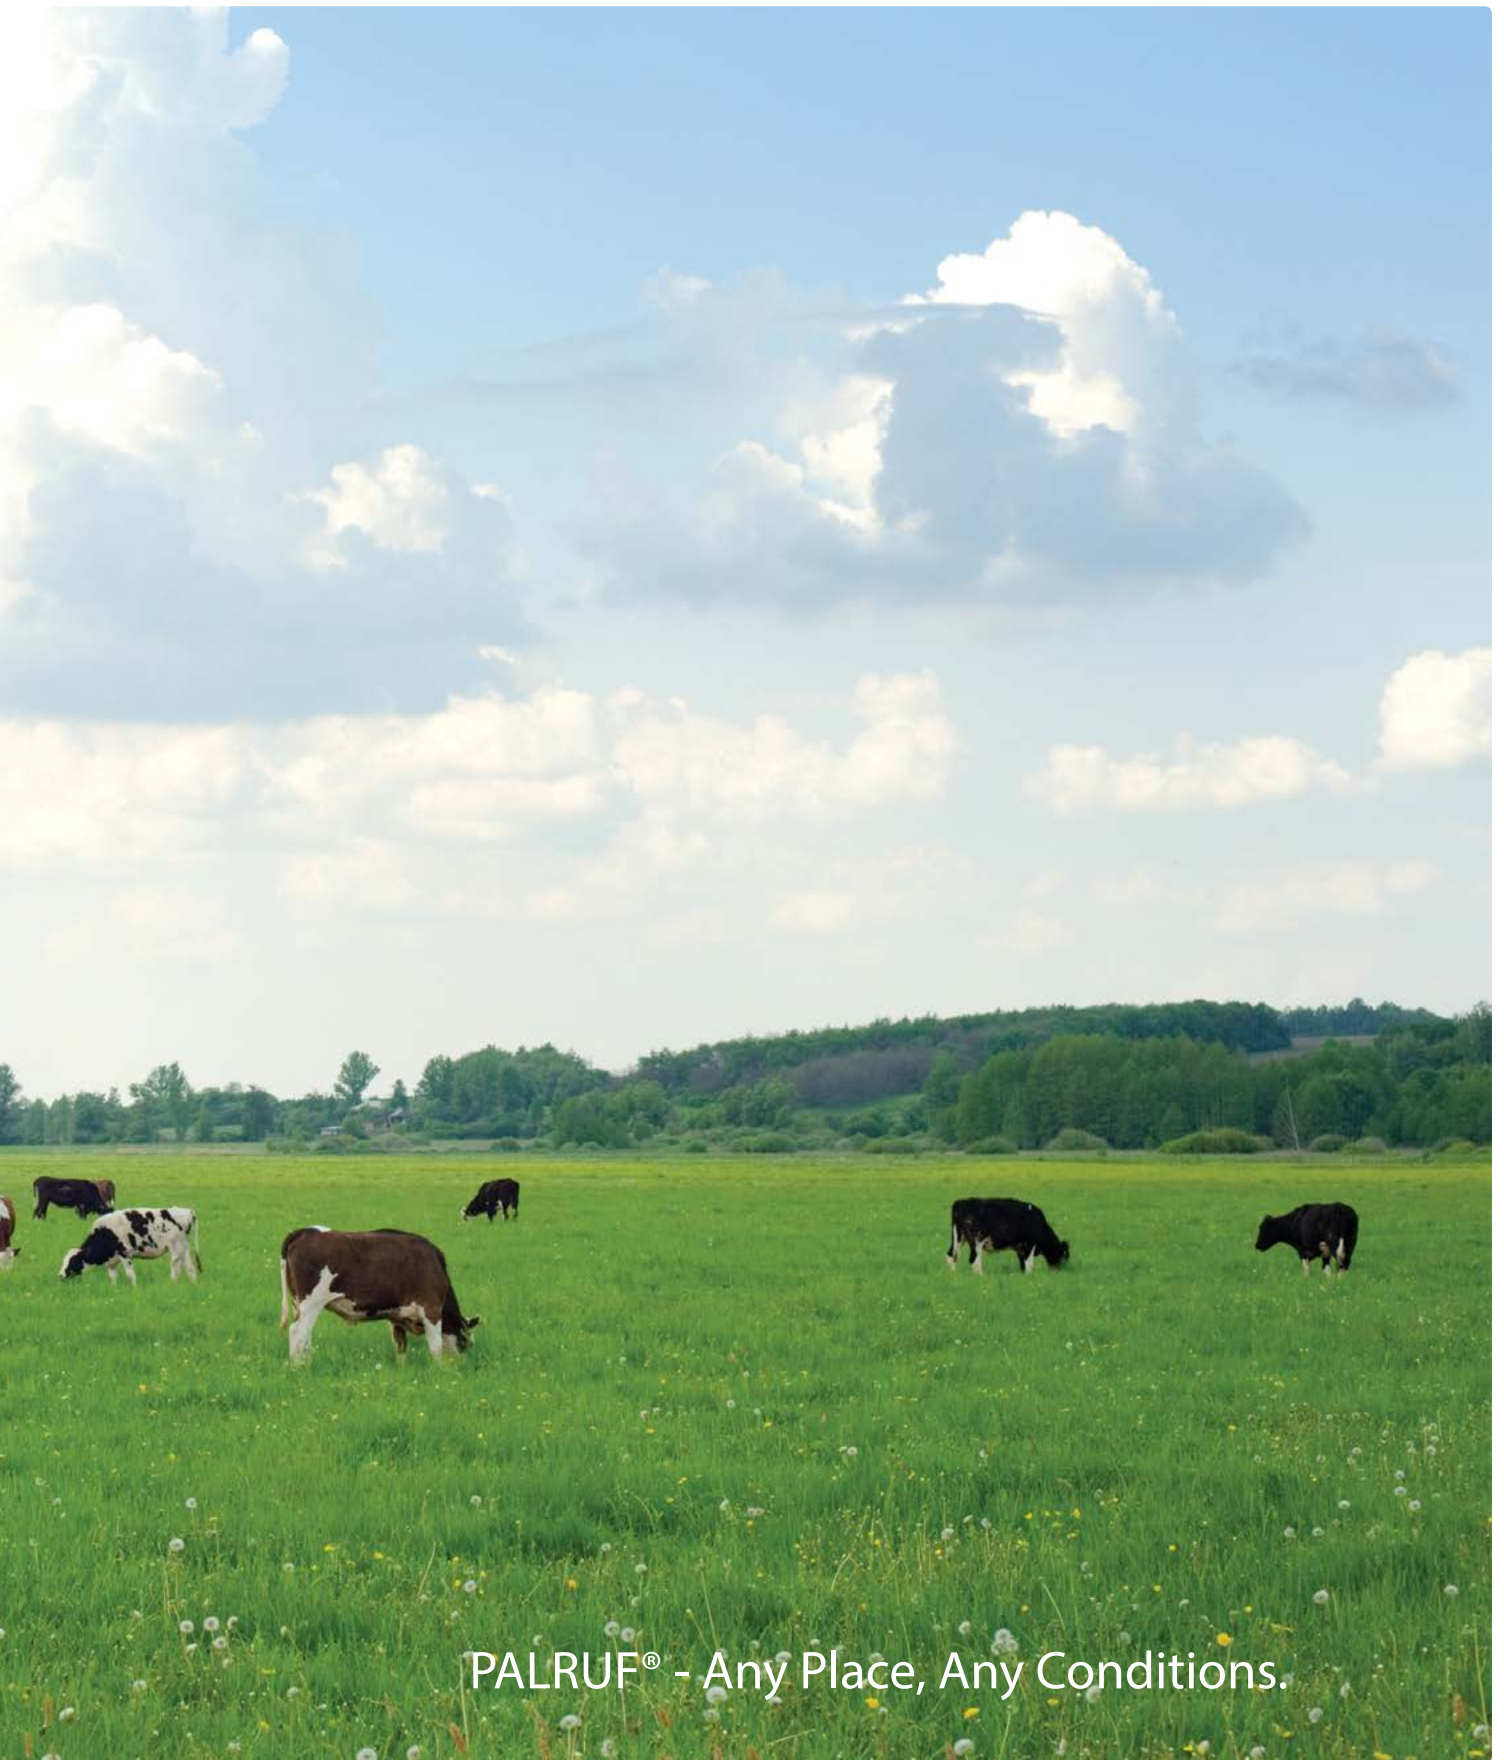

UV and Weather Resistant

Offering long service periods in cold or hot climates.

Better Heat Insulation

Moderate heat buildup compared to metal roofing.

PALRUF® - Any Place, Any Conditions.

Livestock Projects
