SUNTOP®
The Ultimate In Performance and Durability.
SUNTOP blends style, strength, and shade for your roofing or siding project. Available in opaque, rich solid colors, SUNTOP gives DIY pergolas, awnings, sheds, and more 100% shade and protection from harmful UV radiation. Lightweight yet tough, SUNTOP stands up to the most severe weather conditions.

Features and Benefits:
- Impact and UV resistance
- Rigid, lightweight and easy to install
- Rust-free
- Enable curved roofing (cold bending)
- Bright and long-life colors
- Wide temperature service range
- Good thermal insulation
- Environmentally friendly material

2 Standard Sizes
26" W x 8' L and 26" W x 12' L
Note: 26" panel covers 24" with 1 corrugation overlap.

The Ultimate In Performance and Durability.
SUNTOP Corrugated Foamed Polycarbonate Sheet 10 Year Warranty
SUNTOP Foamed Polycarbonate Panels are warranted against fading for a period of 10 years from the purchase date, not to lose more than 5% of their original color (when tested in accordance with ASTM E-308). The above warranties shall apply only if the panels are installed, used and maintained in accordance with Palram recommendations and specifications. See complete warranty, available from Palram Americas, for details.

Note: 26” panel covers 24” with 1 corrugation overlap.

- Impact and UV resistance
- Rigid, lightweight and easy to install
- Rust-free
- Enable curved roofing (cold bending)
- Bright and long-life colors
- Wide temperature service range
- Good thermal insulation
- Environmentally friendly material

Available in Three Opaque Colors
Sedona Brick: No light transmission
Castle Gray: No light transmission
Rain Forest Green: No light transmission

Typical Uses Around The Home & On The Farm
- Car ports
- Deck covers
- Patio covers
- Shade canopies
- Walkway covers
- Awnings
- Fences
- Tool sheds
- Firewood storage covers
- Camping canopies
- Out buildings
- Garbage enclosures
- Stables
- Cabanas

Just a few ideas of what you can do with SUNTOP Corrugated Panels!
Before You Begin

Make sure the color of all panels match. Be sure Panel and Horizontal Closure Support Strip fit together... SUNTOP Polycarbonate Panels are round. Snow, wind and weather loads should be considered when designing the slope degree of your structure (Wx 1½” in 12”). Before installation, check local building codes for relevant specifications and recommendations. Follow local codes at all times.

TRANSPORTATION, handling and storage: For outdoor storage, cover securely with a white opaque polyethylene sheet to avoid solar heat gain between the panels. Penetration of water between the sheets in storage will accentuate this heat gain. Therefore, it is recommended to store the panels indoors. Panels will withstand heat when properly installed and ventilated. Store the panels stacked evenly on a horizontal flat surface with longer lengths on the bottom. Do not stack other items on top of panels. If panels are not stacked directly on floor, be sure to support evenly.

before you begin

BE SURE TO CAREFULLY READ ALL INSTRUCTIONS
