Overview

PALOPAQUE is a flat UV-stabilized PVC sheet, with over 50 years of manufacturing experience that is reflected in its high quality. Easily formed and fabricated, PALOPAQUE is ideal for a wide variety of applications.

PALOPAQUE makes an excellent printing substrate for the advertising and signage industries and is suitable for digital or traditional printing.

With its high chemical resistance, PALOPAQUE is highly suitable for industrial applications.

Main Benefits

- Excellent chemical resistance
- High impact strength
- Easily fabricated and formed
- Highest fire rating, self-extinguishing
- Glossy, Matte Hair-Cell or surfaces
- High electrical and thermal insulation
- Easy fabrication
- Non toxic
- Optional increased UV resistance for outdoor applications

Typical Applications

- Signs and displays
- Point of purchase stands (P.O.P)
- Signs in the food, chemicals and pharmaceutical industries
- Fabricated items
- Chemical process industries
- Sterile surfaces in laboratories
- Air vents

<tr>
<td>2000 x 3000</td>
<td>1 to 4</td>
</tr>
</tbody>
</table>

* Custom dimensions are available, subject to minimum quantity.

Flammability

PALOPAQUE complies with the most demanding international fire resistance standards in the field of plastics, as indicated in the detailed table herein. The classification is subject to product type, thickness and color.

Resistance to Chemicals

Excellent resistance to... Mineral acids, alkalis, plating solutions, paper making chemicals, pickling solutions, other inorganic solutions and fumes thereof.

Good resistance to... Alcohols, aliphatic hydrocarbons, glycols, amines, phenols.

Not recommended to contact... ketones, chlorinated solvents, aromatic hydrocarbons, some esters and ethers.

*For more information please refer to “Chemical Resistance of PVC Products” available at www.palram.com or with your PALRAM distributor.

Fabrication Tips

PALOPAQUE can be easily fabricated using various techniques. Below are general recommendations for some of them.

<table>
<thead>
<tr>
<th>Sawing</th>
<th>Machining</th>
<th>Thermoforming</th>
<th>Drilling</th>
<th>Bonding</th>
<th>Welding</th>
</tr>
</thead>
<tbody>
<tr>
<td>For both band and circular saws</td>
<td>Use low machining speeds for tuning and shaping, and assure free removal of machining chips.</td>
<td>Between 130°C and 170°C, PALOPAQUE sheets become formable and can then be formed, press molded or blow formed.</td>
<td>Use conventional drills, but be certain to remove free drill chips in order to avoid overheating of the sheet. Also, use slow rate of penetration.</td>
<td>PALOPAQUE sheets can be bonded with conventional solvent based PVC adhesives.</td>
<td>PALOPAQUE extruded PVC sheets can be welded by hot-air welding process conventionally used for PVC.</td>
</tr>
</tbody>
</table>

In as much as Palram Industries has no control over the use to which others may put the material, it does not guarantee that the same results as those described herein will be obtained. Each user of the material should make his own tests to determine the material’s suitability for his own particular use. Statements concerning possible or suggested uses of the material described herein are not to be construed as constituting a license under any Palram Industries patent covering such use, or as recommendations for use of such materials in the infringement of any patent. Palram Industries or its distributors cannot be held responsible for any losses incurred through incorrect installation of the material. In accordance with our company policy of continual product development you are advised to check with your local Palram Industries supplier to ensure that you have obtained the most up to date information.
